PHOTOGRAPHY: MOBILE MONET AND TITLEFX

APRIL 19, 2015 | ANNA

Shell photo processed with Mobile Monet and TitleFX

In a prior post I talked about my experiences with “painting” nature photographs using the Mobile Monet app. After attending the excellent presentation given by two of our photo club members, Yvonne Camper and Bill Winn, I added some text to my latest artistic attempt.

The photo above was taken in January 2015 with my iPhone 6 at Moonstone Beach, Cambria, California. After I finished painting with Mobile Monet, I opened the photo in TitleFx and put in the text, trying to match the color scheme already established by the shells.
