# PHOTOGRAPHY: PLANTS AND FLOWERS

MAY 5, 2015 | ANNA

*Succulent*

I'm still experimenting with iPhoneography: the following plant and flower pictures were taken with my iPhone and processed using Snapseed, which is owned by Google and was significantly updated in April 2015.

## My Snapseed workflow: yellow succulent

*Yellow succulent (processed photo)*

1. I used the Crop tool to tighten the image.
2. I used the Details tool to sharpen the image.
3. I used the Tune Image tool to saturate the colors.
4. I used the Vignette tool to blur the edges so the viewer's attention is focused on the center of the rosette.
