# OUR ORCHID PETS

MAY 6, 2018 | ANNA | LEAVE A COMMENT

We love orchids and typically buy a new one at the grocery store every few months.

I hate to throw them away, but after they've finished blooming and I've kept them around for a few weeks just for sentimental reasons, I usually toss them.

However, we now have a trio of orchid "pets" that are ALL reblooming! Somehow we have discovered just the right combination of water, vitamins, and light, and they are rewarding our efforts.

I think my aunt Sal, who was the family orchid expert, is cheering me on from Heaven. Thank you, Aunt Sal, for the encouragement!
