DICK'S LATEST ASTRONOMY PHOTO: CONJUNCTION OF MOON, VENUS AND JUPITER

FEBRUARY 23, 2023 | DICK

Last night (February 21) there was a beautiful conjunction of the Moon, Venus and Jupiter visible in the western sky after sundown. Here is a picture I took from our back deck:

Moon, Venus and Jupiter conjunction

Jupiter is on the top, Venus is in the middle, and then the crescent moon.

Our new home in Glen Ellen, California, is a great place for astronomy.
